## **DETAILED ACTION**

### ***Claim Objections***

1. **Claims 1, 2, 7 and 18** are objected to because of the following informalities:

In line 10 of claims 1, 2, 7 and 18, change "material of his light-transmission region" to read, "material of the light-transmission region"

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 1-4, 6-16 and 18-24** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

**Claims 1, 2, 7, 18 and 19** are awkwardly and confusingly worded. The usage of the percentage sign parenthetically "(%)" as well as the structure of the equation with the accompanying information, such as, "measured at the wavelength", do not clearly state exactly what is intended.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3723

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. **Claims 1-4, 6 and 19-24** are rejected under 35 U.S.C. 102(a) as being anticipated by Roberts 6,676,483.

Roberts discloses a polishing apparatus having the claimed elements that comprise a polishing pad having a polishing region and a light transmitting region, and the light transmitting material being made of polyester polycarbonate polyol. The process by which the apparatus is developed has not been given patentable weight since this is a product by process claim.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. **Claims 7-16**, as best understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts.

Roberts is described above. In describing the apparatus, implicitly describes the claimed manufacturing step, except disclosing that the solution in which the material was submerged is potassium hydroxide. The use of a particular solution is a matter of engineering expedient since the purpose for which the material is to be used is known. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used potassium hydroxide as the solution, since it has

been held that omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art. *In re Karlson*, 136 USPQ 184.

### ***Response to Arguments***

8. Applicant's arguments with respect to claims 1-4, 6-10, 14-16 and 18-24 have been considered but are moot in view of the new ground(s) of rejection.
